Contents

Role of molybdenum in phosphorus-induced temper embrittlements. Ph. Dumoulin, M. Guttman, M. Foucault, M. Palmier, M. Wayman, and M. Biscondi	1
Density of annealing twins. W. Form, G. Gindraux, and V. Mlynar	16
Interdiffusion in ternary Co-Cr-Al alloys. G. W. Roper and D. P. Whittle	21
Fatigue cycling of an austenitic stainless steel in $R = -1$ loadings. R. G. Luther and T. R. G. Williams	29
Thermal analysis of In-Pb-Sn system. D. S. Evans and A. Prince	34
Discussion: Methods for quantitative study of inclusions taking part in ductile fracture process. D. B. Rayaprolu and D. Jaffrey	37
Analysis of mechanical properties and microstructure of high-silicon dual-phase steel. H. K. D. H. Bhadeshia and D. V. Edmonds	41
Effect of hydrogen on the fracture properties and microstructure of Ti-6Al-4V. H. Hoeg, B. Hollund, and I. W. Hall	50
Stress-induced absorption and emission of point defects by grain boundaries. A. H. King and D. A. Smith	57
Nucleation and growth of creep cavities in a Type 347 steel. N. G. Needham and T. Gladman	64
Fatigue behaviour of aged gas-nitrocarburized low-carbon steel. D. H. Thomas and T. Bell	73
Short communication: Comparison between two models of cleavage fracture. D. A. Curry	78
Removal of casting porosity in superalloy IN738 using hydrostatic pressure sintering. R. A. Stevens and P. E. J. Flewitt	81
Effects of chromium additions on irradiation-induced void swelling in α -iron. E. A. Little and D. A. Stow	89
Influence of frequency and microstructure on fatigue crack growth in Ti-6Al-6V-2Sn. N. R. Moody and W. W. Gerberich	95
Influence of cold rolling on the microstructure and properties of lath martensite in alloy steels. F. H. Samuel and D. S. Sarma	101
Stress corrosion cracking and temper brittleness: effect of phosphorus grain boundary segregation in a low-alloy steel. C. Lea	107
Electron statistical model for cohesion and vacancy formation in copper. J. Å. Schweitz and O. Vingsbo	113
Discussion: Thermodynamic and X-ray studies of fcc to fct phase transformation in In-Tl system. M. De Bonte, P. Wollants, and J. R. Roos	117
Acta Metallurgica Gold Medal 1979	119
Coarsening of vanadium carbide, carbonitride and nitride in low-alloy steels. N. K. Balliger and R. W. K. Honeycombe	121
Creep of nickel at low stresses. B. Burton, I. G. Crossland, and G. W. Greenwood	134
Fatigue crack growth and threshold measured at very high frequencies (20 kHz). S. Stanzl and E. Tschegg	137
Scanning optical microscope as new metallographic tool. T. Wilson, D. K. Hamilton, P. J. Shadbolt, and B. Dodd	144
Short communication: Nickel-rich region of Ni-Al-Nb system at 1473 K. P. Nash, F. P. L. Kavishe, and D. R. F. West	147
Thermal analysis of solidifying alloys in non-faceted/faceted eutectic systems. S. Chiba and J. A. Spittle	150
Dislocation creep in nickel and copper. H. E. Evans and G. Knowles	152
Critical assessment: Clean steel - a debatable concept. R. Kiessling	161
Serrated yielding in nickel thermally charged with hydrogen. V. K. Garg and M. N. Shetty	173
Splat-cooled iron-titanium-carbon alloys. I. R. Sare	177
Effects of deformation on decomposition of austenite: Part II - Carbide precipitation. D. J. Walker and R. W. K. Honeycombe	184
Fracture toughness of TiC-coated cemented carbides. K. G. Stjernberg	189
Deformation of fine-grained aluminium alloys. D. J. Lloyd	193
Discussion: Effect of isothermal tempering on acoustic emission during ductile fracture of low-alloy steel. D. Jaffrey	199
29th Hatfield Memorial Lecture: Ferrite. R. W. K. Honeycombe	201
Compaction and mechanical properties of metallic glass. D. G. Morris	215
Order hardening: comparison between revised theory and experiment. A. J. Ardell	221
Effect of temperature range on extent of microstructural degradation during thermal cycling of unidirectionally solidified eutectic composite. S. P. Cooper and J. Billingham	225
Thermodynamics of steels: carbon-carbon interaction energy. H. K. D. H. Bhadeshia	230
Structure and properties of low-carbon steel after deformation to high strains. R. L. Aghan and J. Nutting	233
Short communication: Evidence for NbCN precipitation in undeformed austenite. A. Brownrigg and R. Boelen	237
Role of carbon in embrittlement phenomena of tempered martensitic 12Cr-0.15%C steel. G. V. Prabhu Gaunkar, A. M. Huntz, and P. Lacombe	241
Decomposition of ferrite to austenite in 26%Cr-5%Ni stainless steel. P. D. Southwick and R. W. K. Honeycombe	253
Threshold stress for creep dispersion-strengthened alloys. H. E. Evans and G. Knowles	262
Cavity growth in superplastic alloys. M. J. Stowell	267
Nickel-rich region of Ni-Cr-Ta system at 1523 and 1273 K. P. Nash and D. R. F. West	273
Flow stress analysis of thermomechanically treated 2036 aluminium alloy. M. C. Chaturvedi, D. J. Lloyd, and D. W. Chung	277
Discussion: Influence of grain size and yield strength of threshold fatigue behaviour in low-alloy steel. G. R. Yoder, L. A. Cooley, and T. W. Crooker	283

Contents

Papers presented at conference on 'Micromechanisms of crack extension' (Mechanics and Physics of Fracture II) held at Churchill College, Cambridge, on 31 March–2 April 1980

Comparison of theory and experiment for elastic-plastic plane-strain crack growth. L. Hermann and J. R. Rice	285
Role of state of stress in crack tip failure processes. J. W. Hancock and M. J. Cowling	293
Micromechanisms of crack extension in polymers. A. J. Kinloch	305
Cleavage micromechanisms of crack extension in steels. D. A. Curry	319
Micromechanisms of fibrous crack extension in engineering alloys. J. F. Knott	327
Relationship of strain hardening and damage in ductile fracture. R. Iricibar, G. leRoy, and J. D. Embury	337
Modelling crack tip failure mechanisms in polymers. J. G. Williams	344
Micromechanisms of crack extension in composites. B. Harris	351
Micromechanisms of crack extension in ceramics. P. L. Pratt	363
Solute segregation and intergranular brittle fracture in steels. M. L. Jokl, Jun Kameda, C. J. McMahon Jr, and V. Vitek	375
Creep crack propagation by cavitation near crack tips. R. Raj and S. Baik	385
Intergranular fracture during power-law creep under multiaxial stresses. A. C. F. Cocks and M. F. Ashby	395
Diffusional growth of intergranular cavities in uniform stress field and ahead of crack-like stress concentrator. V. Vitek	403
Micromechanisms of fatigue crack growth at high stress. B. Tomkins	408
Micromechanisms of fatigue crack growth at low stress intensities. C. J. Beevers	418
Crack growth behaviour of structural materials in high-temperature water environments. T. A. Prater, F. P. Ford, and L. F. Coffin	424
Micromechanisms of crack growth in liquid metal environments. C. F. Old	433
Micromechanisms of crack growth in composite materials under corrosive environments. P. J. Hogg and D. Hull	441
Micromechanisms of crack growth in ceramics and glasses in corrosive environments. S. M. Wiederhorn, E. R. Fuller Jr, and R. Thompson	450
Combination of fracture mechanics, probability, and micromechanical models of crack growth in ceramic systems. R. W. Davidge	459
Role of micromechanical models in risk analysis. C. A. Rau Jr, P. M. Besuner, and K. G. Sorenson	463
Aging and creep behaviour of 15%Cr–15%Ni–Mo–Ti–B steel. F. E. Asbury and G. Willoughby	473
Ledge mechanism of growth of colonies of discontinuous precipitate in austenite. G. J. Cocks, R. A. Legge, and D. R. Miller	480
Dislocation structures associated with fracture surface topographies in Stage II fatigue crack growth in copper and 70:30 brass. K. Katagiri, J. Awatani, K. Koyanagi, Y. Onishi, and M. Tsuji	485
Flow behaviour of Mar M200 powder compacts during isothermal forging. A. Y. Kandeil, J.-P. A. Immarigeon, W. Wallace, and M. C. de Malherbe	493
<i>Short communication:</i> Ti(Al, Si)₃ compound formation in non-equilibrated Al–Ti–Si alloy. W. V. Youdelis and C. S. Yang	500
<i>Short communication:</i> Effect of specimen size on reproducibility of creep rupture test results on Type 316 stainless steel weldments. C. A. P. Horton and J. K. Lai	502
<i>Short communication:</i> Metallographic evidence for superplastic flow. K. A. Padmanabhan	506
<i>Short communication:</i> Influence of manganese diffusion coating on fatigue behaviour of steels. S. F. Dirnfeld and D. Shechtman	509
Precipitation reactions in Ti-stabilized austenitic stainless steel. T. Thorvaldsson and G. L. Dunlop	513
Partition of silicon during eutectic solidification of iron–carbon–silicon alloy. A. Kagawa and T. Okamoto	519
Diffusion of ⁹⁹Mo, ⁹⁵Zr, and ⁶⁰Co in 316 stainless steel. R. V. Patil, G. P. Tiwari, and B. D. Sharma	525
Surface segregation in a 3Cr–0.5Mo steel. J. Woodward and G. T. Burstein	529
Chemical potential and surface energy in stress–corrosion cracking. J. M. West	534
Theoretical diffusion profiles in single-phase ternary systems. G. W. Roper and D. P. Whittle	541
<i>Sixth Hume-Rothery Memorial Lecture:</i> Electrons in crystalline and non-crystalline metals: from Hume-Rothery to the present day. N. Mott	557
Formation of supersaturated ferrite during decomposition of austenite in iron–copper and iron–copper–nickel alloys. R. A. Ricks, P. R. Howell, and R. W. K. Honeycombe	562
Mechanical properties and acoustic emission in A533B steel in temperature range 24–288°C. G. Airoidi	569
Development of duplex deformation substructure during extrusion of a commercial Al–5Mg–0.8Mn alloy. T. Sheppard and M. G. Tutchter	579
Nature of star-shaped clusters of FeAl₃ in aluminium–iron alloys. E. Louis, R. Mora, and J. Pastor	591
<i>Short communication:</i> Sound velocities and elastic constants of steels 304, 310 and 316. H. M. Ledbetter	595
<i>Short communication:</i> Resistivity of aluminium binary alloys in annealed condition. E. Louis and C. G. Cordovilla	597
Book notices	118, 550
Corrigenda	119
Instructions to authors	155, 551

The Charles Hatchett Award

Description of Award

The Award, for travel to Brazil (and possibly for travel to Europe for a prize winner from Latin America) with maintenance for approximately two weeks, is administered by The Metals Society and is granted annually from funds provided by the Companhia Brasileira de Metalurgia e Mineração (CBMM) to individuals who, in the judgment of a panel of experts, publish papers of outstanding merit within the following range of subjects:

- (i) the extractive metallurgy of niobium
- (ii) the physical and applied metallurgy of steels and alloys containing niobium either alone or in combination with other metals
- (iii) the fabrication and application of structures and components made from such steels and alloys.

Constitution

An International Consultative Panel of not less than six and not more than eight members who are required to be individuals of knowledge and standing in the metallurgical science, production, and use of niobium selects the prize-winning paper.

The Panel is appointed by The Metals Society in consultation with CBMM for a period of three years, the Council of The Metals Society having the right to reappoint members once in consultation with CBMM.

The following are the present members of the Panel:

Dr S. R. Keown (Sheffield University, Sheffield)

(Coordinator of the Panel and Consultant)

Professor P. Brozzo (Centro Sperimentale Metallurgico, Rome)

Dr T. Gladman (British Steel Corporation, Rotherham)

Dr M. Grumbach (IRSID, St Germain-en-Laye)

Dr H. Gondoh (Nippon Steel Corporation, Kimitsu)

Professor W. C. Leslie (Michigan University, Ann Arbor)

Dr L. Meyer (Thyssen AG, Duisburg)

M. L. Pearl (The Metals Society, London)

(Secretary of the Panel).
